Subject: Re: FYWP - question on DE comparison group

Great thanks on the courses! Though just to confirm we are including the IM and IN courses in the DE comparison group?

→ Can I see the results with and without inclusion, please? there is a wider issue here with international management. The result from someone elses data analyses is that those in 4 year degree perform higher. But they did not filter out the WP/FY students for the comparison. I was wondering whether the 4 year degrees achieve higher marks because maybe they are from more affluent backgrounds (hence can afford the extra year and the extra cost of going abroad).

Ok this makes sense and is a good question. Will do.

→ for Sue's purposes, it's going to be interesting to break down the 4 year degrees for ethnicity etc. and compare separately.

OK, noted.

Re Brian's data deletion, we can try going back to older files but not ideal long term solution. But I think we only need to know this when we are looking more closely at students who've left (which we haven't done yet), whereas at the moment our approach has been to drop those who have left and compare students who are either enrolled or who've finished. Does that seem correct?

→ agreed. Make a note of the issue so we don't forget and we can return to it if needed.

Literally noted!

Hi Matt
Commenting with Brian's response on data deletion. Can we take the missing data from the older data files?

Hi Tina

Sorry slipped through the cracks, I said I would send you student numbers by course so we can select a comparison group to compare FY marks etc. at UG level.

You'll see that adding categories where there are only a couple of FY students will add quite a substantial DE chunk.

I've included a column to indicate which courses we should include, when you have a moment (easy to change later if necessary) would you mind going through and adding in where you think?

Thanks!

Matt

Perhaps we can narrow it down to full-time undergraduate students, I'm not sure what you asked him to provide before, so could be useful. Or what will you need as a comparison group when you're doing the presentation / report in September and what will be useful for the dashboard

in September and what will be useful for the dashboard.

I could of course ask Johnstone to provide the data for the remaining students that we have on the WBS list. Should I?

Subject: FYWP - question on DE comparison group

Hi Tina

Sorry I'm bombarding you with questions, might be better for us to have a meeting later in the week to talk these through. But here's another!

When looking at direct entry WP and demographics for ethnicity generally, in the past we always limited the DE comparison group to the same courses as FY students — namely: [Accounting: AF, AFI, AFUPP, AFU; Management: MN, MNI, MNF, MNM]. I only noticed this because there's a slight difference in the Johnstone data and the more general student data we have now.

This makes sense for marks etc. comparison, but for WP and demographics in WBS more generally, we might cast our net a bit wider. Problem is, there are LOADS of course types (see pasted table below) and leaving it open includes far too many people that it can't be reasonable. Many of them don't have Johnstone demographic data either.

So one option is just to use those for whom there is Johnstone data; another is to choose the courses from below; and another is to just compare WP and ethnicity using the same courses as FY.

As I said, we could meet up to chat about this and the other small things I've been sending through.
